

SPAM Filter 2.0

Complete Annihilation of the Internet's #1 Irritant

Every survey shows it and analysts won't stop talking about how much email users detest SPAM. Take the planet's number one killer application (email) and then infest it with junk mail and you've got a time consuming nuisance on your hands – IF you don't have the right tools!

Now you do. Audiora's SPAM Filter 2.0 leaps ahead of the anti-SPAM pack by solving the thorniest SPAM killer issues while you:

- 1. Continue receiving good, legitimate mail;**
- 2. Benefit from more current and effective filtering in two modes: normal and aggressive;**
- 3. Experience tremendous ease-of-use when activating SPAM filter 2.0.**

Reduce time spent on junk email by using the # 1 demanded application on the Internet:

SPAM Filter 2.0. It kills SPAM. Not your email!

SPAM Filter 2.0 is more reliable and aggressive. Its new advanced technologies avoid black list filtration by learning and remembering legit sender profiles, eliminating false SPAM screening. You will continue to receive the email you want, while junk mail is eliminated. Plus, you benefit from more current and effective filtering in two modes: normal and aggressive.

SPAM Filter 2.0 is easy to use because it works with Audiora's EasyMail system. Simply login to your SiteOS or personal mail and perform a few simple steps to reduce your SPAM infestation.

SPAM Filter 2.0 Features and Benefits

Features	Benefits
Offers two filtration levels to assist with SPAM avoidance.	You can choose your own SPAM filtration aggressiveness.
Provides a number of mail delivery options for email flagged as SPAM.	You can eliminate email identified as SPAM automatically or review it later.
Ability to block a number of foreign languages.	You can avoid receiving emails outside of your language of choice.
"Always Allow List" provides you with the ability to receive email that would potentially be classed as SPAM.	You can control and select which email deliveries you will receive from external contacts.
"Always Block List" gives you the ability to block specified mail from being delivered to your inbox.	You can eliminate annoying and time consuming mail from specified email addresses and domains.
Ability to recover any mail identified as SPAM.	You can review mail classed as SPAM to ensure proper delivery of those that are legitimate.
